

Lecture 3
Intellectual Property
Activity 3 – Create and Protect

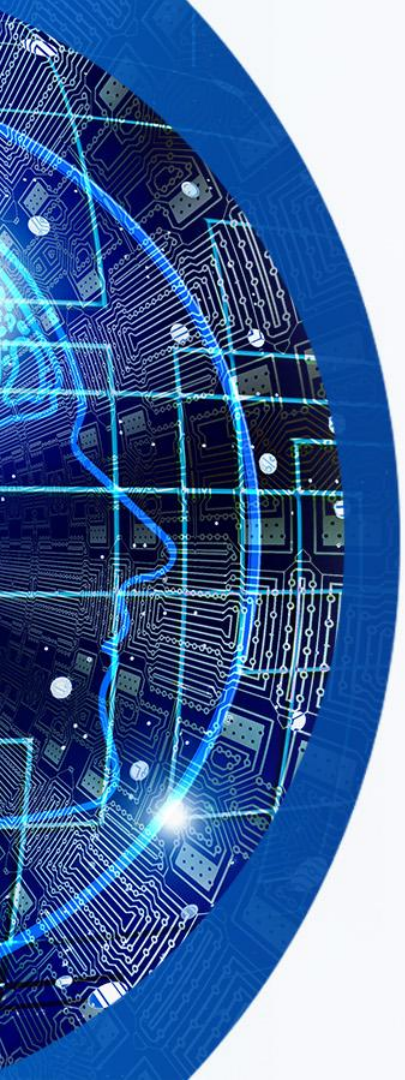

Learning Objectives

After completing this activity, students will be able to:

- Demonstrate understanding by creating or analyzing an original work that can be protected by IP laws

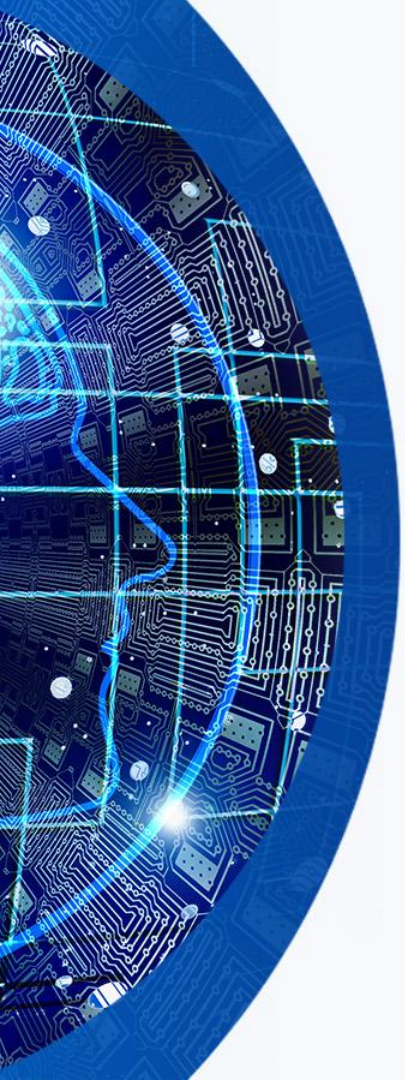

Materials Needed

- • Art or presentation materials (for creative output)

Instructions:

1. Form a group composed of five (5) members or last presented group of activity 2.
2. Design your own product, process, logo, or invention
3. Identify which type of IP protection it needs and explain why
4. Present your creation to the class (example: poster, presentation, etc.)
5. Discuss also the contribution of the members of the group.
